

This Amendment adds Section 13.7 to address bulk storage of deicing materials.

13.7 Storage of Bulk De-Icing Materials:

13.7.1 Purpose:

Negative environmental impacts to surface and groundwater may occur when bulk salt and other deicers are not properly stored

13.7.2.

All bulk salt and other deicing materials stored outdoors must always be placed on an impervious surface and covered. When not using a permanent roof, a waterproof, impermeable cover must be used and secured to prevent removal by wind or other storm events. Any storage location shall be placed to avoid areas likely to absorb runoff.
